

AMENDMENTS TO THE CLAIMS

Please cancel claim 25 without prejudice and accept amended claims 5-7 and 17 as follows:

1. (Previously Presented) A method for providing sales support, comprising the steps of:

issuing the customer a mobile device and a corresponding identification, wherein the mobile device issues an electronic service request including a customer purchase order for a product having a product identifier;

receiving the electronic service request including the customer purchase order;

tracking a location of the mobile device issued to the customer; and

delivering the product to a checkout register according to the location to which the mobile device is tracked.

2. (Cancelled)

3. (Original) The method of claim 1, further comprising the step of issuing the customer a mobile device, wherein the mobile device determines the product identifier.

4. (Cancelled)

5. (Currently Amended) The method of claim [[4]] 1, wherein the customer identification is persistent.

6. (Currently Amended) The method of claim [[4]] 1, wherein the customer identification is issued with the service request.

7. (Currently Amended) The method of claim [[4]] 1, further comprising the step of storing the service request in a customer database corresponding to the customer identification.

8. (Original) The method of claim 1, wherein the product identifier is determined according to one of a product radio frequency identification tag, a bar code scan, a verbal description provided by the customer, a digital photo, and an alphanumeric identification.

9. (Previously Presented) A method for providing sales support, enabling a business and a customer to communicate via a mobile device, comprising of the steps of:

issuing the customer the mobile device;

receiving an electronic service request including a product identifier and a customer query via the mobile device;

retrieving data corresponding to the product identifier from a product database;

determining a portion of the data corresponding to the product identifier and relating to the customer query;

delivering an electronic reply to the mobile device including the portion of the data corresponding to the product identifier and relating to the customer query;

determining a customer purchase order for a selected product, the electronic service request including the customer purchase order;

tracking a location of the mobile device issued to the customer to a checkout register; and

delivering the selected product to the checkout register according to the location to which the mobile device is tracked.

10. (Original) The method of claim 9, further comprising the step of issuing the customer a customer identification, wherein the customer identification associates the mobile device with the customer.
11. (Original) The method of claim 10, wherein the database stores the association between the mobile device and the customer.
12. (Original) The method of claim 10, further comprising the steps of:
 - making the association upon issuing the mobile device to the consumer; and
 - breaking the association upon return of the mobile device to the business.
13. (Original) The method of claim 9, further comprising the step of tracking the customer within the store based on a position of the mobile device in relation to a plurality of beacons.
14. (Original) The method of claim 13, wherein a server stores positions over time as position data.
15. (Original) The method of claim 14, further comprising the steps of:
 - logging the position data; and
 - mining the position data for a pattern of movement.
16. (Original) The method of claim 9, wherein the product identifier is determined according to

one of a product radio frequency identification tag, a bar code scan, a verbal description provided by the customer, a digital photo, and an alphanumeric identification.

17. (Currently Amended) A method for providing interactive sales support to a customer via a mobile device comprising of the steps of:

receiving user input via the mobile device;
determining whether the user input is a customer query, if so, adding the customer query to a query queue and delivering an acknowledgment to the mobile device confirming the receipt of the customer query, wherein the query is a customer specified question or comment about a product corresponding to the product identifier;
determining a number of preceding queries in the query queue;
delivering an indication of the number of preceding queries to the mobile device;
determining a response to the customer query in the query queue; and
delivering the response to the mobile device.

18. (Original) The method of claim 17, wherein the step of determining the response further comprises the steps of:

parsing the customer query for at least one key word; and
retrieving a response corresponding to the key word from a database.

19. (Original) The method of claim 17, further comprising the steps of:

determining whether the user input is a product identifier, if so, retrieving data corresponding to the product identifier from a database; and

delivering the response to the mobile device including the data corresponding to the product identifier.

20. (Cancelled)

21. (Previously Presented) The method of claim 1, wherein the customer query comprises one of a digital photo and a voice memo.

22. (Previously Presented) The method of claim 9, wherein the query is a customer specified question or comment about a product corresponding to the product identifier.

23. (Previously Presented) The method of claim 9, wherein the customer query comprises one of a digital photo and a voice memo.

24-25. (Cancelled)

26. (Previously Presented) The method of claim 17, wherein the customer query comprises one of a digital photo and a voice memo.
